MICROSOFT OFFICE 365 EXCEL ESSENTIALS TRAINING COURSE OUTLINE

FOREWORD

In this Excel 365 Essentials course, participants will learn ways this new web application can increase collaboration and productivity. Users of this software will share and simultaneously work on spreadsheets, as well as be able to easily access spreadsheets from anywhere and across computers. This course will teach the new interface, as well as all of the basics of creating and using spreadsheets. Techniques for managing data and displaying data visually will be taught.

The Office 365 experience is designed to render your documents to look exactly like they would when printed, from nearly anywhere in the world. This tool provides its users the freedom to work from anywhere.

OUTCOMES

In this course, participants will

- ▶ Discover features this Excel web application offers to increase productivity and convenience, such as the ability to access spreadsheets anywhere and share with collaborators
 - ▶ Understand how to work simultaneously on a spreadsheet
 - ▶ Learn the basics of creating, editing, and saving spreadsheets
 - ▶ Understand the work modes offered, including working in the browser and Excel
 - ▶ Increase knowledge of editing spreadsheets in the browser and be able to proficiently use the new interface
 - ▶ Understand the difference between Formulas and Functions, and how to use both to calculate required data
 - ▶ Learn formatting options to make data more readable and emphasize important sections
 - ▶ Recognise how to organize and display data in Charts, improving the visual readability of data trends
 - ▶ Learn techniques for managing data, such as sorting and using filters to display only the data that is required
-
